DETAILED ACTION

Terminal Disclaimer

Terminal disclaimer filed on 2/7/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the full statutory term prior patent No. 6,580,106 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **John E. Vandigriff** on 2/14/2006. Claims 1, 2, 7, 8, 13 & 14 have been amended to clarify the claim language and to provide proper antecedent basis as set forth below:

Regarding **claim 1**, in lines 4-6 of claim 1, the limitations "having a gate surrounding a source and being conductively connected to the source." are replaced by -- having a gate surrounding a source, wherein the gate is conductively connected to the source. --.

Art Unit: 2615

Regarding **claim 2**, in lines 2-3 of claim 2, the limitation “the punch through potential barrier of the vertical punch-through transistor.” is replaced by -- a punch through potential barrier of the vertical punch-through transistor. --.

Regarding **claim 7**, in lines 5-7 of claim 7, in line 5 of claim 1, the limitations “having a gate surrounding a source and being conductively connected to the source.” are replaced by -- having a gate surrounding a source, wherein the gate is conductively connected to the source. --.

Regarding **claim 8**, in lines 2-3 of claim 8, the limitation “the punch through potential barrier of the vertical punch-through transistor.” is replaced by -- a punch through potential barrier of the vertical punch-through transistor. --.

Regarding **claim 13**, in lines 3-5 of claim 13, the limitations “a charge detection device in said image sensor including a vertical punch-through transistor having the gate surrounding the source and being conductively connected to the source.” are replaced by -- a charge detection device in said image sensor including a vertical punch-through transistor having a gate surrounding a source, wherein the gate is conductively connected to the source. -

Regarding **claim 14**, in lines 2-3 of claim 14, the limitation “the punch through potential barrier of the vertical punch-through transistor.” is replaced by -- a punch through potential barrier of the vertical punch-through transistor. --.

Allowable Subject Matter

Claims 1-3, 7-10 & 13-16 are allowed.

Art Unit: 2615

The following is an examiner's statement of reasons for allowance:

Regarding each of independent claims 1, 7 and 13, the prior art of record fails to teach or fairly suggest a charge detection device for use in an image sensor, a CMOS device or a CCD device in which the charge detection device includes a *vertical punch-through transistor having a gate surrounding a source*, wherein the gate is *conductively connected* to the source.

Regarding claims 2 & 3, these claims are allowed as being dependent from claim 1.

Regarding claims 8-10, these claims are allowed as being dependent from claim 7.

Regarding claims 14-16, these claims are allowed as being dependent from claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
